

Creating scientists of the future by ensuring our pupils...

Ask 'Why?'

Cultivate their curiosity through 'Ask like an expert'.

Involve the whole school community in their science learning, on and offsite

Are encouraged to take risks, experiment, reflect, make and learn from mistakes, in a safe environment

Make links to previous learning, broader curriculum and their life experience

Confidently use their scientific knowledge by using appropriate vocabulary and able to 'Speak like an expert'

Are challenged, stimulated and curious about Science and developing a strong Science Capital

'Hands on: Minds on' Lead their learning by carrying out and planning purposeful investigations and linking their findings to knowledge

Hypothesise, theorise and share their ideas and evidence to provide solutions to their questions and answers
